Job description

The position is lab-based, full-time, 40hrs/wk, 8-430, from Tuesday to Saturday and is fast paced as we work to rear insects and scheduling revolves around their biological life-cycles. Our production team is focused on getting quality biological products to customers at a competitive price point as we strive to grow our market share as part of the global Andermatt company. We're looking for focused people who will share our goal of making improvements every day on the job and help us grow the company long-term as a team member.

Daily work is an array of highly specific tasks so we do a lot of training in-house. Lab experience is an asset. Attention to detail and experienced teamworking skills are essential. Successful application on condition of a 3 month probationary period and a Criminal Record Check to enter place of work at the Hugh John Flemming Centre. As we work in a Federal Building, mask wearing in common areas and upon entry to the building is required.

Please send resumes to: adam.sipkema@andermattcanada.ca
