

VARROX® Eddy

The First Portable Evaporator with Li-Ion Technology

Period of best use

1	2	3	4	5	6	7	8	9	10	11	12
---	---	---	---	---	---	---	---	---	----	----	----

- Lightweight, portable, battery powered
- Full electronic control for temperature and time
- One button walk away operation

Best Application

- ✓ Best application in colonies free of capped brood
- ✓ Ideal at temperature below 5 °C
- ✓ Use pure oxalic acid dihydrate for evaporation without residues

Dosage

- ✓ 1 g for Langstroth (1 body)
- ✓ 2 g for Langstroth (2 bodies)
- ✓ 2 g for Dadant hives

1. Prepare
the pan with oxalic acid dihydrate.

2. Insert
pan and place VARROX® EDDY
through flight opening.

3. Apply
with one button operation.
Remove VARROX® EDDY upon
blinking signal.
